

# Integration of HighRadius Accounts Receivable Software with Leading ERPs

## Introduction:

HighRadius Accounts Receivable Automation Software integrates natively with leading ERPs to bridge critical Order-to-Cash gaps. Unlike standalone ERP modules, HighRadius enhances collections, credit, cash application, and invoicing functions with AI-driven intelligence and end-to-end automation—driving tangible business outcomes from day one. With a plug-and-play approach requiring minimal IT effort, your finance team gains full control over receivables & customer communication.

### Finance Outcome You Can Count On

#### The HighRadius Impact

“HighRadius reduced the amount of effort required in every process to a bare minimum. It helped the team focus on critical cases that required more human touch, like strategic decision-making and creating better customer relationships.”

*Kay Rogers, Vice President of North America Financial Transactions for Ferrero*

## Even the Best ERPs Fall Short for Enterprise A/R Operations

Enterprise ERPs are built for transactional accuracy – not agility. While platforms like SAP, Oracle, and Microsoft Dynamics serve as reliable systems of record, they often limit finance teams with rigid workflows, fragmented customer data, and a lack of automation. HighRadius AR Automation Software is purpose-built to extend your ERP, helping global finance teams optimize working capital and scale operations without reengineering core systems.

<b>Disconnected Processes</b>	<b>Manual Collections &amp; Reporting</b>
Credit reviews, invoicing, and payments often require navigating multiple ERP modules.	Collections workflows rely heavily on spreadsheets and IT-dependent ad hoc reporting.
<b>Limited Payment &amp; Billing Flexibility</b>	<b>No Predictive Insight into Risk or Cash Flow</b>
ERP tools struggle with global formats, multiple currencies, and e-payment integration.	ERPs lack real-time analytics for payment behavior, delinquency trends, or forecasting.

### ERP Gaps that Slow Enterprise Finance

Instead of investing in complex ERP customizations or bolt-ons, enterprises integrate with HighRadius AR automation software to unlock automation, AI-powered collections, and complete A/R visibility—without compromising ERP integrity.

## How HighRadius Offers Plug-and-Play ERP Integration with Enterprise-Grade Performance

HighRadius Accounts Receivable Automation Software connects seamlessly with your existing ERP - no rip-and-replace, no business disruption. Whether you're operating on SAP, Oracle, Microsoft Dynamics, or Sage Intacct, our product suite ensures a secure, scalable, and future-ready setup that minimizes IT effort and maximizes finance agility.

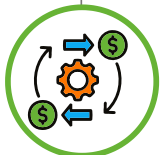

### Enterprise-Grade Security & Compliance

- Compliant with GDPR, HIPAA, SOC 1 & 2, PCI DSS.
- Data is encrypted in transit and at rest.
- Role-based access controls with audit trails.

### HighRadius Extractor

- Installed within your ERP to extract required datasets in CSV format.
- Works over secure SFTP with zero business process disruption.
- No dependency on ERP customization or external middleware.

### Real-Time & Batch APIs

- Standardized APIs for JSON-based data exchange.
- Supports both push and pull models based on enterprise data cadence.
- Designed to scale with global transaction volumes and enterprise data models.

### Minimal IT Involvement

- HighRadius manages implementation and data mapping.
- IT teams are only required to configure ERP exports for master data, open A/R, and payment files.
- Enables finance to move fast—without waiting in IT queues.

### The HighRadius Impact

“With HighRadius, everything is connected, and we have a single source of truth. They have always wanted to see us succeed as well, and so we’ve had great success just partnering with them.”

*Jacob Whetstone, Director of Credit & AR, Danone*

## From ERP-Integrated to Future-Ready: Real Business Impact with HighRadius

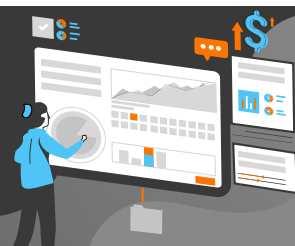

HighRadius isn't just another integration layer—it's a transformation layer. By automating core A/R processes on top of your existing ERP, enterprise finance teams gain more than just operational efficiency. They gain control, insight, and the agility to lead with data.

Here's how global organizations are achieving measurable outcomes at scale:

CFOs & Finance Leadership	Global A/R & Shared Services Leads	Collections & Credit Teams
<p>Real-time visibility into cash positions, DSO, and bad debt exposure</p> <p>Reduction in DSO by up to 15% within 6 months</p> <p>Audit-ready compliance &amp; security controls</p>	<p>Standardized global processes across ERPs, regions, and BUs</p> <p>Centralized exception handling and automated dunning</p> <p>A 50% reduction in manual interventions for dispute and credit management</p>	<p>AI-prioritized worklists improve productivity by 30%</p> <p>80%+ of collections communication automated</p> <p>Fewer spreadsheet-based reports, more insight-driven actions</p>

Finance teams unlock **80% ROI in just 3-6 Months** by integrating HighRadius AR Software with existing ERP systems.

## About HighRadius

HighRadius offers cloud-based **Autonomous Software** for the Office of the CFO. More than 850 of the world's leading companies have transformed their Order to Cash, Treasury & Risk, Record to Report, B2B Payments and Accounts Payable processes with HighRadius. Our customers include 3M, Unilever, Anheuser-Busch InBev, Sanofi, Kellogg Company, Danone, Hershey's and many more.

Autonomous software is data-driven software that continuously morphs its behavior to the ever-changing underlying domain transactional data. It brings modern digital transformation capabilities like artificial intelligence, robotic process automation, natural language processing, and connected workspaces as out-of-the-box features for the finance & accounting domain.

Before the availability of autonomous software, finance stakeholders had to pick between a digital replacement of a paper-based solution or build & maintain custom RPA/AI-based tools in-house. In contrast, HighRadius' Autonomous platform combines the best of both worlds to deliver measurable business outcomes such as DSO reduction, working capital optimization, bad-debt reduction, reduced month-end close timelines, and improved productivity in under six months.
