

Automate 80% of Close Tasks and reduce your Close Days with HighRadius Agentic AI-Based LiveCube Platform

LiveCube accelerates your month-end close by automating repetitive Excel-based tasks, such as data imports and reconciliation logic, with its 200+ pre-built AI agents. Once integrated with your source systems, LiveCube updates data in real time in its centralized platform. The AI agents auto-match transactions based on historical patterns, and with a single click, you can send matched items for approval and auto-post them to your ERP. Get complete visibility into every action to ensure audit readiness and compliance.

Auto Journal Posting

Excel Dependency Elimination

Replaces fragmented Excel sheets with a single platform, removing version control issues, formula errors, and data silos.

Automated Journal Entry Management

LiveCube auto-generates recurring and adjustment journal entries using AI-driven rules, eliminating manual entry errors and speeding up approvals.

Intercompany Mismatch Detection and Resolution

LiveCube identifies intercompany mismatches in real time, suggests eliminations, and auto-posts adjustments, reducing delays and ensuring group-level accuracy.

The Challenges

Accounting teams spend countless hours rebuilding the same reconciliation logic in Excel. This repetitive prep introduces errors, and slows down the close. Without a standardized system, even small changes in data formats break workflows, creating delays, and needs last-minute fixes during close. Limited visibility and scattered documentation, prevents team from meeting deadlines and audit requirements.

Excel Crashes with High-Volume Data

When accountants load large ERP or bank files, Excel slows down or crashes. This delays reconciliations and risks data loss.

Reconciliation Logic Lives in Isolated Sheets

Each sheet has slightly different formulas and formats. This causes version mismatches and slows down review and approval.

Errors Go Unnoticed Until It's Too Late

Mistakes in formulas or mappings often go undetected during close. This leads to late rework and delays in reporting.

No Audit Trail or Version History

Excel doesn't track changes across users or files. This creates confusion during reviews and adds risk during audits.

Cleanup Work Repeats Every Month

Teams manually rebuild the same filters and logic each period. This repetitive prep eats up time and introduces errors.

No Real-Time Task or JE Tracking

Close progress is tracked manually across calls and emails. Managers struggle to see what's complete and where teams are stuck.

Manual Journal Creation and ERP Posting

Accountants copy data from Excel into ERP, one JE at a time. This slows the process and increases the risk of errors.

The Solution

Built for Large Data Volumes

LiveCube handles 5M+ records from ERPs or banks without crashing. You can view and work on large datasets with no lag or data loss.

Recon Logic as AI Agents

Reconciliation and accrual logic are converted into reusable AI agents. They run across entities and periods with consistent outputs.

Auto-Routed Exceptions

LiveCube flags mismatches or data gaps instantly. Issues are routed to the right reviewers so that you don't have to deal with any late-cycle surprises.

Reusable Cleanup Workflows

Data transformations like filters and formulas are saved as workflows. They run automatically whenever new data arrives, so you don't have to rebuild logic.

Live Task Status Tracking

Close progress updates automatically as tasks complete. You get real-time visibility by task, entity, and period.

One-Click Journal Posting

Journal entries are generated from logic sheets and posted to ERP with a click. No file prep or manual formatting needed.

Complete Audit History

Every action is logged with a name, timestamp, and change history. You get full traceability for compliance and review.

Seamless Connectivity with ERPs & Other Financial Systems

Bank Integration

Out-of-the-Box Support for Standard Banking Formats: Supports industry-standard bank file formats (BAI, BAI2, MT940) and provides real-time insights into which bank statements have been received and processed.

Low-Volume Bank File Import: CSV file formats can be uploaded from banks if online integration is not required, for example, due to low monthly activity within an account. System allows for the ingestion of files received via a designated email inbox as long as it adheres to supported format.

Bank API Integration: HighRadius provides integration with multiple Bank APIs through a third-party API aggregator. This service is available for 10000+ financial institutions based in the US and Canada.

ERP Integration

SFTP & API Integration: HighRadius supports major ERPs such as SAP ECC, SAP S/4 Hana, Oracle NetSuite, Oracle Fusion, Salesforce, Workday, and Quickbooks.

Low-Volume ERP Data Import: Supports ingestion and export of CSV and xlsx files.

Other Financial System Integration

Excel and CSV Support: Datasets like payroll, credit card statements, AP sub-ledger systems, and bank statements can be downloaded and uploaded in our account reconciliation software through simple CSV and Excel uploads.

Keep Your Data Confidential and Safe

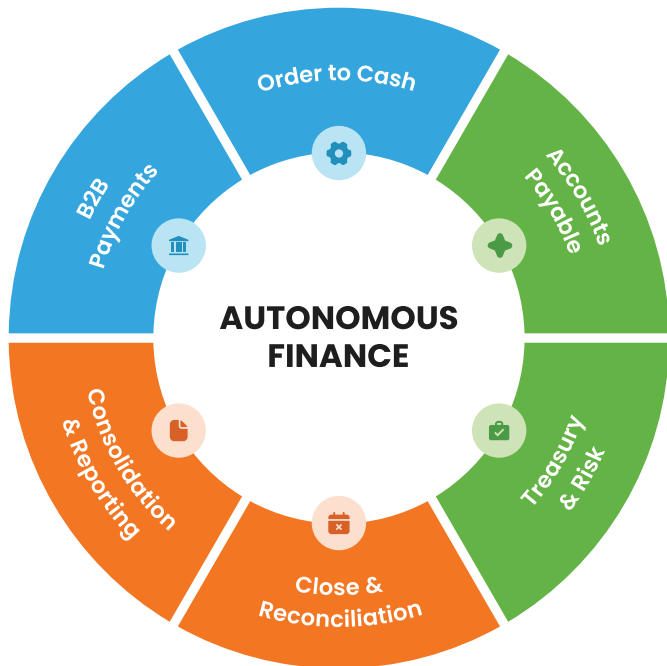

Compliance with industry standards and regulations, including GDPR, HIPAA, SOC 1 Type 2, SOC 2 Type 2, and PCI DSS.

- Comprehensive InfoSec reviews from multiple banks and over 500+ corporate customers.
- Encryption of data at rest and in transit, ensuring data privacy and security.
- Role-based access controls to ensure authorized access to data.

Reduce Financial Close Cycles by upto 30%

Don't settle for the ordinary. Discover the extraordinary with HighRadius.

Value Creation For The Office Of The CFO

Via Single Agentic AI Platform

- ✓ **20%** Reduction In DSO
- ✓ **30%** Faster Financial Close
- ✓ **50%** Reduction In Idle Cash
- ✓ **40%** Increase In Productivity

About HighRadius

HighRadius provides a single Agentic AI platform for the Office of the CFO. It integrates 200+ agents that orchestrate end-to-end processes across **Order-to-Cash**, **Close & Reconciliation**, **Consolidation & Reporting**, **Accounts Payable**, **B2B Payments**, and **Treasury & Risk**. HighRadius guarantees operational KPI improvements by mapping them to specific agents on the platform. With a 3-6 month go-live period, HighRadius drives value creation at 1100+ enterprises such as 3M, Unilever, Bristol-Myers Squibb Company, Red Bull, Lufthansa, and more. HighRadius has been consistently recognized as a market leader by Gartner, IDC, and Forrester.
