Statutory Reports

Get access to detailed P&L, Balance Sheet, and Cash Flow statements with interactive drill-downs, giving you direct access to line-level details for faster, more accurate financial analysis.

Management Report

By comparing actuals to budget and forecast with drill-downs, CFOs gain accurate insights, align financials across entities, and make informed decisions for precise cash flow predictions.

Personalized Reports

Overcome Excel's limitations by using drag-and-drop tools and Excel plug-ins, enabling quick, dynamic reports that deliver real-time insights, empowering teams with customized financial analysis.

The Challenges

CFOs and controllers often face limited reporting visibility, restricting real-time insights, drill-down capabilities, and the ability to identify variances, leading to issues such as:

Limited Data Traceability

Limited drill-down capabilities make it difficult to trace variances back to the source data, leading to incomplete analysis and missed insights.

Limited Financial Visibility

Fragmented data often leads to challenges in reporting and misrepresentation of financials, making variance analysis difficult and resulting in a lack of reliable insights.

Forecasting Discrepancies

Aligning forecasts from different entities with varying financial structures makes it difficult to predict cash flow accurately and develop unified, data-driven financial strategies.

Inflexible Reports

Manual Excel-based reporting restricts customization, delays real-time updates, and forces teams to spend hours on adjustments instead of focusing on strategic financial analysis.

The Solution

Drill-Down Analysis

Unlock full traceability with detailed drill-downs, allowing you to trace variances back to the source data and uncover critical insights for more accurate and informed decision-making.

Real-time Insights

Provide CFOs with real-time, interactive dashboards that offer instant access to key metrics, allowing them to create custom views, track financial performance, and make accurate, data-driven decisions with ease.

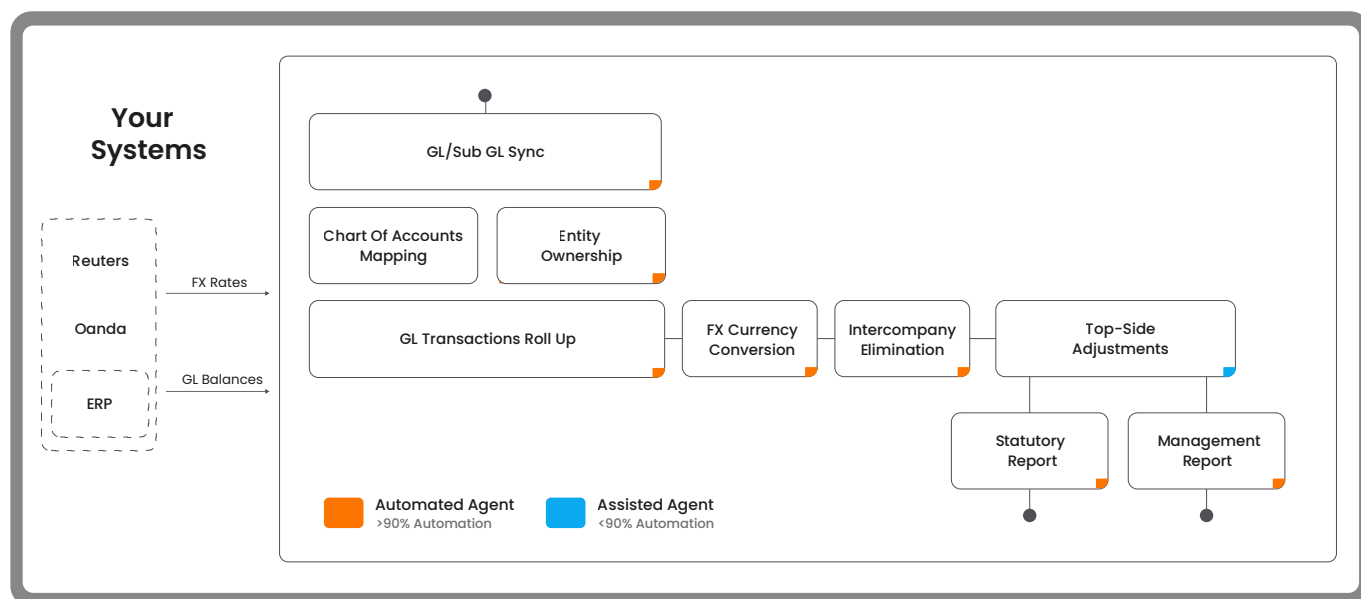

Predictive Analysis

Streamline forecasting by consolidating data from different entities, analyzing trends, and providing automated variance commentary for accurate cash flow predictions and unified strategies.

Personalized Reports

Use drag-and-drop tools and Excel plug-ins to automate report generation, enabling real-time updates and customization, allowing teams to focus on strategic financial analysis.

Consolidation & Reporting Agentic AI Orchestration

Value Creation at 1100+ Enterprises

Seamless Connectivity with ERPs & Other Financial Systems

Bank Integration

Out-of-the-Box Support for Standard Banking Formats: Supports industry-standard bank file formats (BAI, BAI2, MT940) and provides real-time insights into which bank statements have been received and processed.

Low-Volume Bank File Import: CSV file formats can be uploaded from banks if online integration is not required, for example, due to low monthly activity within an account. System allows for the ingestion of files received via a designated email inbox as long as it adheres to supported format.

Bank API Integration: HighRadius provides integration with multiple Bank APIs through a third-party API aggregator. This service is available for 10000+ financial institutions based in the US and Canada.

ERP Integration

SFTP & API Integration: HighRadius supports major ERPs such as SAP ECC, SAP S/4 Hana, Oracle NetSuite, Oracle Fusion, Salesforce, Workday, and Quickbooks.

Low-Volume ERP Data Import: Supports ingestion and export of CSV and xlsx files.

Other Financial System Integration

Excel and CSV Support: Datasets like payroll, credit card statements, AP sub-ledger systems, and bank statements can be downloaded and uploaded in our account reconciliation software through simple CSV and Excel uploads.

Keep Your Data Confidential and Safe

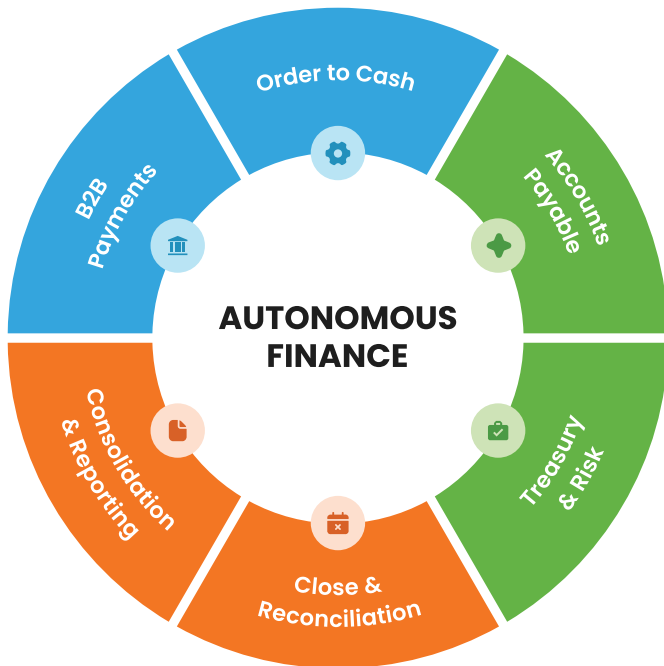

Compliance with industry standards and regulations, including GDPR, HIPAA, SOC 1 Type 2, SOC 2 Type 2, and PCI DSS.

- Comprehensive InfoSec reviews from multiple banks and over 500+ corporate customers.
- Encryption of data at rest and in transit, ensuring data privacy and security.
- Role-based access controls to ensure authorized access to data.

Get up to 100% Accurate Financial Report

Don't settle for the ordinary. Discover the extraordinary with HighRadius.
