

# Proactively Manage Accounting Anomalies in **12 Weeks**

With HighRadius' Autonomous Anomaly Management Software, your teams are able to identify anomalies and resolve them faster- **not in months, but weeks!**

## Faster and Accurate Anomaly Management

### Real-time anomaly detection

Get alerts for potential anomalies based on AI capability to analyze data, establish patterns and identify deviations that could indicate an anomaly.

### Faster anomaly resolutions with workflows

Alert users to potential issues in real-time through automated workflows and enable them for a quicker investigation and resolution.

### Better visibility of anomalies & transactions

A single source of truth for all transactions and a customized view of anomalies enable you in making funding and investing decisions efficiently.

### No disruption to the existing IT landscape

Easily plug and play into ERPs with real-time API and/or Hex (SFTP) integrations, and get started with AI-powered cash application.

### Improved compliance & auditability

Viewing all anomaly attributes in one place helps auditors find the right information and support documents for ensuring the accuracy of financial statements.

### Minimal IT dependency

Pre-packaged modules, industry-specific best practices, and remote deployment allow customers to minimize the need for internal IT involvement.

## Trusted by Accounting Teams Across the Globe

# Solution Architecture That's Autonomous

**HighRadius Anomaly Management Software** integrates with your ERP to collect all data and transactions from General Ledger (GL) and to automatically create a worklist of potential anomalies for analysts. Its AI algorithm analyzes all transactions that occurred in the past 12 to 18 months and flags odd transactions that don't fit the defined pattern. A centralized work system allows accountants to maintain all their work papers in one place and collaborate efficiently. After your team is done resolving anomalies and making all necessary corrections, HighRadius automatically posts the changes in journal entries to your ERP.

## Key Product Features

### Anomaly Detection

Flag critical anomalies through an analysis of your ERP transactions by our ML engine and identify key attributes like risk categories, account details, and more. Enable your account teams to prioritize anomalies and take action by creating tasks on their worklists.

### Anomaly Resolution

Swiftly take action on anomalies with a complete list of anomalies flagged as errors or omissions and guided by suggestions for corrections powered by AI. Quickly resolve anomalies by choosing between 'Ignore', 'Close', or 'Create Task' based on the anomaly type.

# Seamless Connectivity with ERPs, Banks & Other Financial Systems

## Bank Integration

**Out-of-the-Box Support for Standard Banking Formats:** Supports industry-standard bank file formats (BAI, MT940, MT942) and provides real-time insights into which bank statements have been received and processed.

**Low-Volume Bank File Import:** CSV and Excel file formats can be uploaded from banks if online integration is not required, for example, due to low monthly activity within an account.

## ERP Integration

**Out-of-the-Box Integration:** HighRadius Extractor (HEX) add-on supports all major ERPs such as SAP ECC, SAP s/4 Hana, Oracle NetSuite.

**SFTP & API Integration:** Supports SFTP and API integration for Quickbooks, Sage Intacct, and Microsoft Business Central

**Low-Volume ERP Data Import:** Supports Excel, and CSV formats to pull financial close for modeling.

## Other Financial System Integration

**Excel and CSV Support:** Datasets like GL balances, GL line items, all AP and AR, legal entities, and bank statements can be downloaded and uploaded in our anomaly management software through simple CSV and Excel uploads.

## Keep Your Data Confidential and Safe

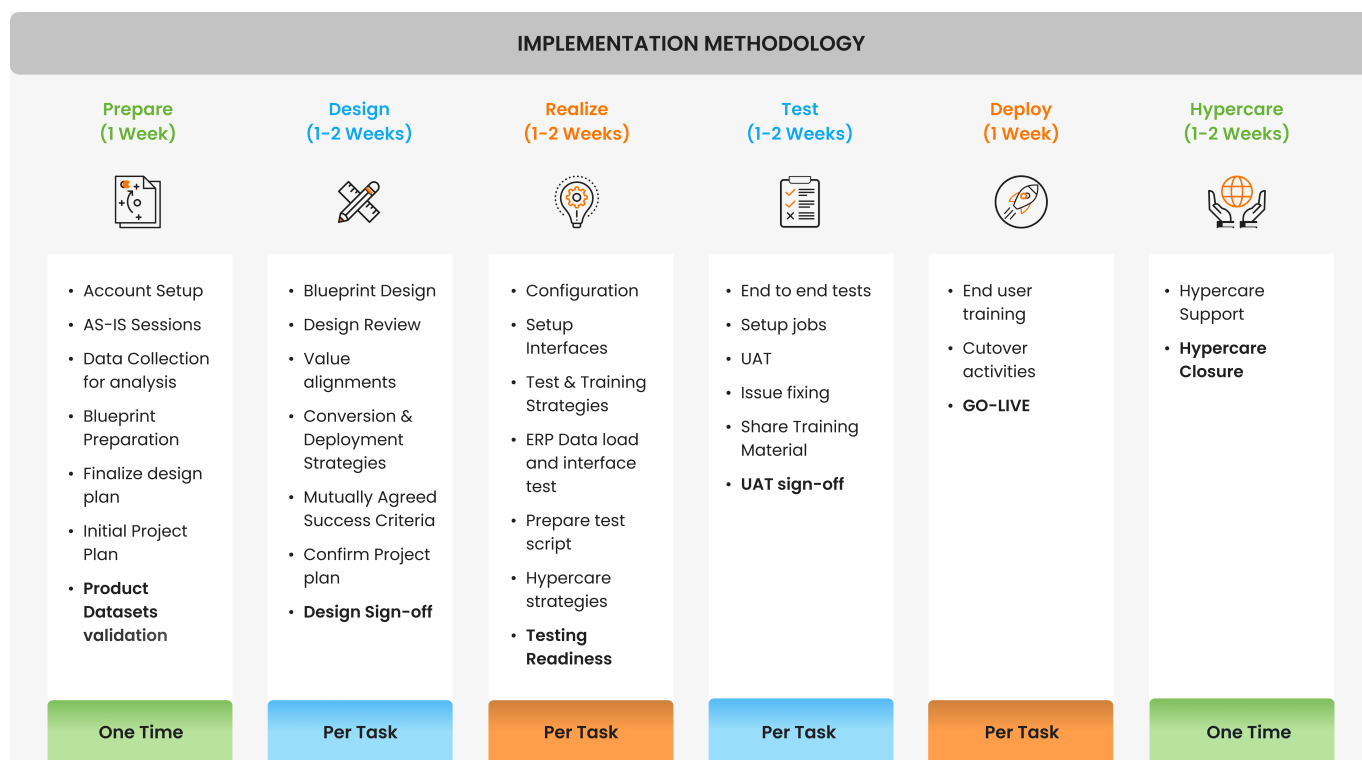

HighRadius' Anomaly Management Software has all the necessary compliances and accreditations required to keep your data confidential and safe.

- Compliance with industry standards and regulations, including GDPR, HIPAA, SOC 1 Type 2, SOC 2 Type 2
- Comprehensive InfoSec reviews from multiple banks and over 500+ corporate customers
- Encryption of data at rest and in transit, ensuring data privacy and security
- Role-based access controls to ensure authorized access to data

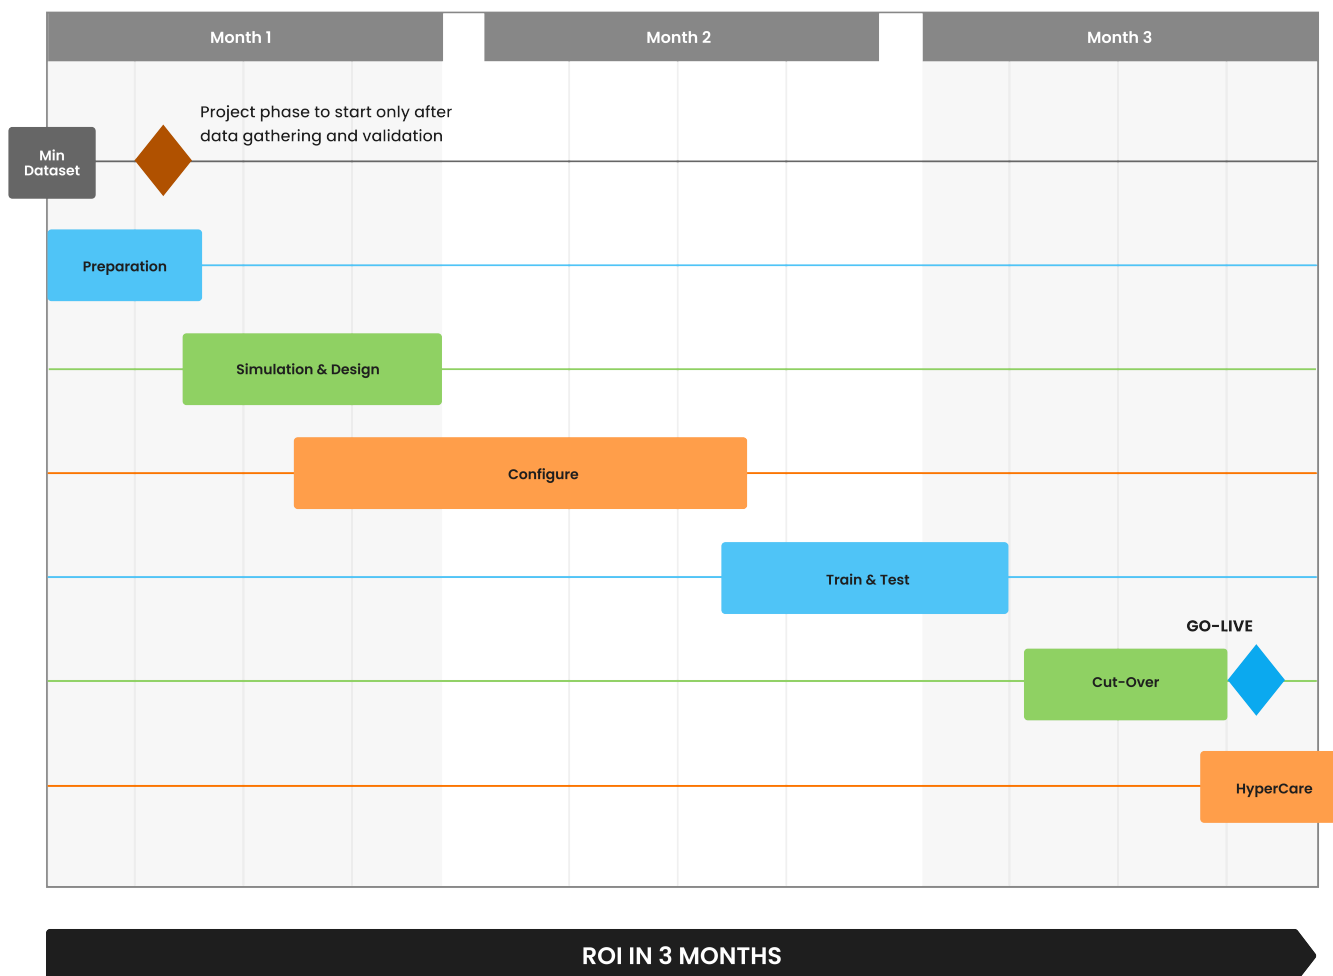

# An Onboarding Program Designed For a Quick ROI

Our onboarding program includes 5 tasks prioritized as per your organization's goals in each phase that gets completed in 12 weeks.

# Lightning-Fast Implementation with ROI in 3 Months

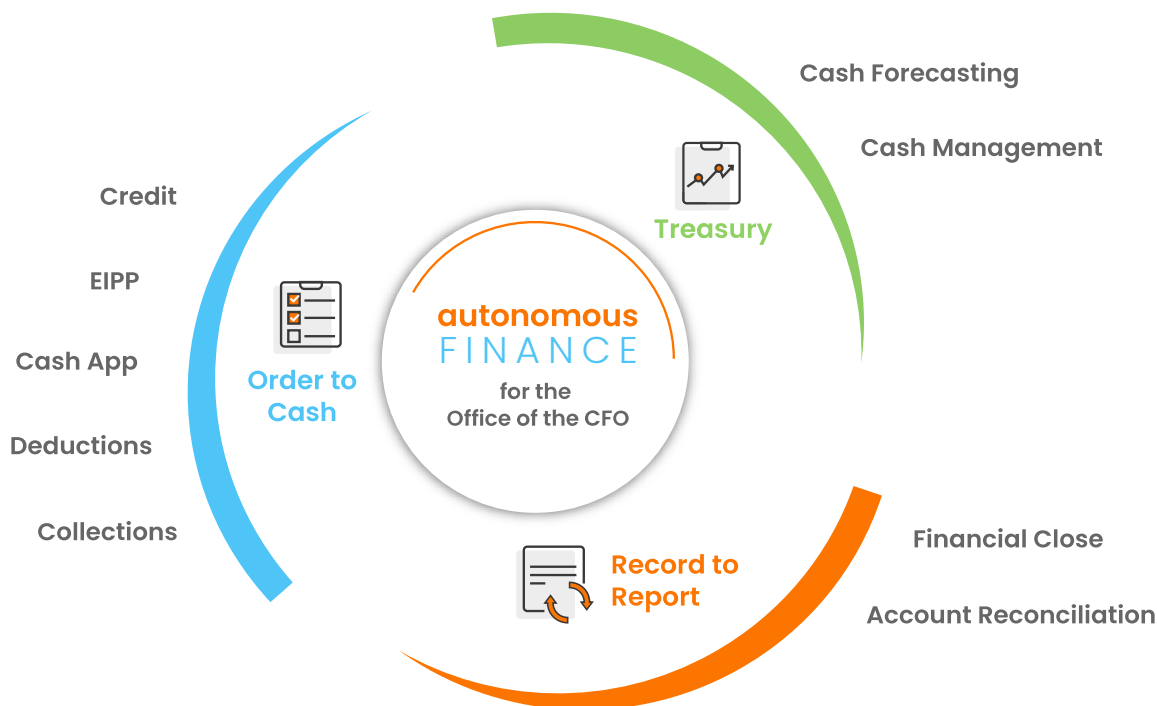

With HighRadius, you can begin automatically detecting anomalies in 6 months.

## Proactively Manage Accounting Anomalies in 12 Weeks

Don't settle for the ordinary. Discover the extraordinary with HighRadius.
