Blocked Orders  
Reduced

### Credit Application Processing

Fetch all the necessary information required to onboard a customer, improving the onboarding time.

### Credit Review

Standardize & automate the manual task of credit scoring so the analysts can work on more credit reviews each day.

### Blocked Order Prediction

Predict upcoming blocked orders and get order release recommendations to proactively review blocked orders.

## The Challenges

Outdated manual credit management is a time sink, leaving credit managers vulnerable to risks and burdening analysts with excessive workload –

### Lengthy Onboarding Process

Onboarding new customers typically takes around 20 days due to back-and-forth correspondence for required information.

### Complex Credit Approval Hierarchy

Companies face challenges with varied hierarchy headcounts as managing credit for customers with hierarchy can be challenging when it comes to distributing credit limits, reviewing credit risk and approvals across business units, leading to delays in approvals and prolonged review processes.

### Manual Data Entry Errors

Inputting data manually from various sources like emails, paper, and fax increases the likelihood of errors.

### Manual Credit Data Collection

Gathering credit data involves manual retrieval from multiple sources such as credit agencies and financials, resulting in time-consuming aggregation and research efforts.

### Disconnected ERP Systems

Siloed Accounts Receivable processes arise from the use of disparate ERPs across different business units, complicating the retrieval and updating of customer data.

### Blocked Order Management

Credit analysts struggle with manual order reviews, causing shipment delays and revenue loss. Without real-time risk insights, they waste time on low-risk holds while high-risk orders slip through.

## The Solution

### Credit Application Processing

AI agents collect all customer data via online credit applications & validate it with third-party data.

### Financial Statement Data Capture

AI agents calculate financial ratios after extracting data from 15+ sources.

### Credit Review

AI agents prioritize credit reviews & auto-send decision correspondence.

### Credit Agency Integration

AI agents extract 100+ data points from 35+ agencies to suggest credit limits.

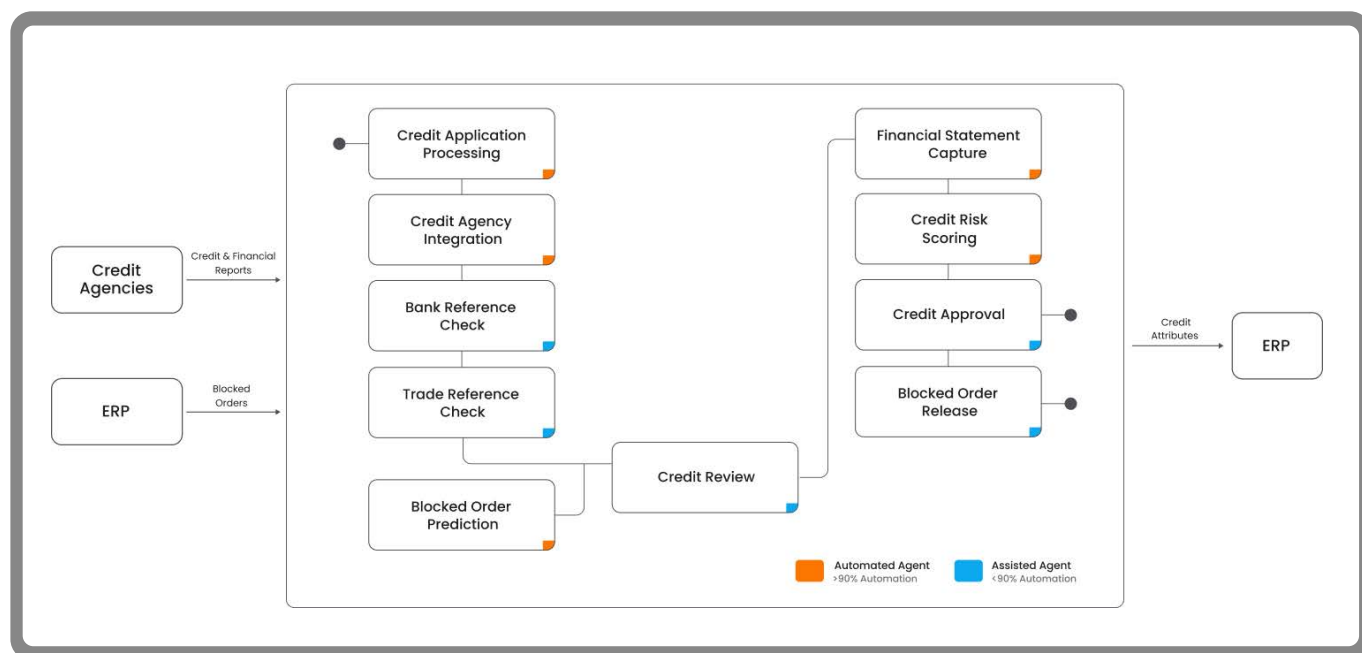

### Blocked Order Prediction

AI agents predict blocked orders for the next three days using AI models.

### Credit Risk Scoring

AI agents evaluate credit risk using AI-based credit scoring models.

# Credit Agentic AI Orchestration

## Value Creation at 1100+ Enterprises

**FERRERO**

**DURACELL®**

**YASKAWA**

**Staples**

**Brightstar**

## Seamless Connectivity with ERPs & Other Financial Systems

### ERP Integration

**Out-of-the-Box Integration with All Major ERPs:** Supports all major ERPs such as SAP, Oracle NetSuite, Microsoft Dynamics, Sage Intacct, and others.

**API integration:** Supports API integration for Quickbooks, Sage Intacct, and Microsoft Business Central.

### Integration With 40+ Agencies

**Out-of-the-Box API Integration Supporting:**

- CreditSafe, Experian, S&P, Moody's, Equifax, D&B, Serasa for credit reports
- Edgar for public financial information
- Coface, Allianz Trade, Atradius for credit insurance information

## Other Financial System Integration
