highradius

Increase Net Recovery Rate by 30% with AI-Powered Deductions Management Software

HighRadius Deductions Management Software helps companies automate their deductions resolution process with 12+ AI Agents that capture claims from emails and portals, predict deduction validity, auto-code reasons, and enable one-click dispute denials—accelerating recovery and reducing manual effort.

30% Improvement in Net Recovery

40% Increase in FTE Productivity

90%+ Claim Backup Aggregation

30%↑ Improvement in Avg Days to Validate

2X Deductions Resolved per day

Faster Access to Claim Documents
Reduce analyst time by auto-capturing claim documents from portals, emails, and PDFs, making them instantly available for resolution.

Faster Deduction Validation
Reduce validation time by automatically matching deductions with contracts, promos, and delivery data—so analysts spend less time on research and more on resolution.

Resolve More Deductions per Day
Double the number of deductions resolved per day by predicting validity to eliminate manual research on valid claims and prioritize disputable ones for faster resolution.

The Challenges

Manual Claim Aggregation from multiple Sources

Claim documents arrive via portals, emails, and PDFs, but analysts manually retrieve, extract, and organize them—slowing down the resolution process.

No Clear Way to Identify Valid vs. Invalid Deductions

Thousands of deductions flow in, but only a small portion are disputable. Without predictive tools, analysts waste time researching claims that don't need action.

Complex, Manual Denial Processes for Invalid Claims

Denying deductions requires analysts to log into customer portals or send emails with backup—adding to turnaround time and lowering denial success rates.

Time-Intensive Validation Across Claim Types

Validating deductions for pricing, shortages, and trade promotions requires data from multiple systems—ERP, contracts, delivery proofs, TPM—making it time-consuming and error-prone.

Fragmented and Manual Dispute Workflows

Cross-functional approvals and handoffs are handled manually via email or spreadsheets, leading to delays, confusion, and missed recovery opportunities.

The Solution

Automated Claim Backup Aggregation

AI agents capture claim documents from customer portals, emails, and PDFs, auto-fill key fields, and link them to the right deductions.

Deduction Validity Predictor

ML-powered agents assess whether deductions are valid or invalid with confidence scores and action codes—helping analysts focus only on disputable claims.

One-Click Dispute Denials

AI agents prepare dispute packages, attach backup documents, and submit denials directly on customer portals—tracking status and enabling re-disputes with a single click.
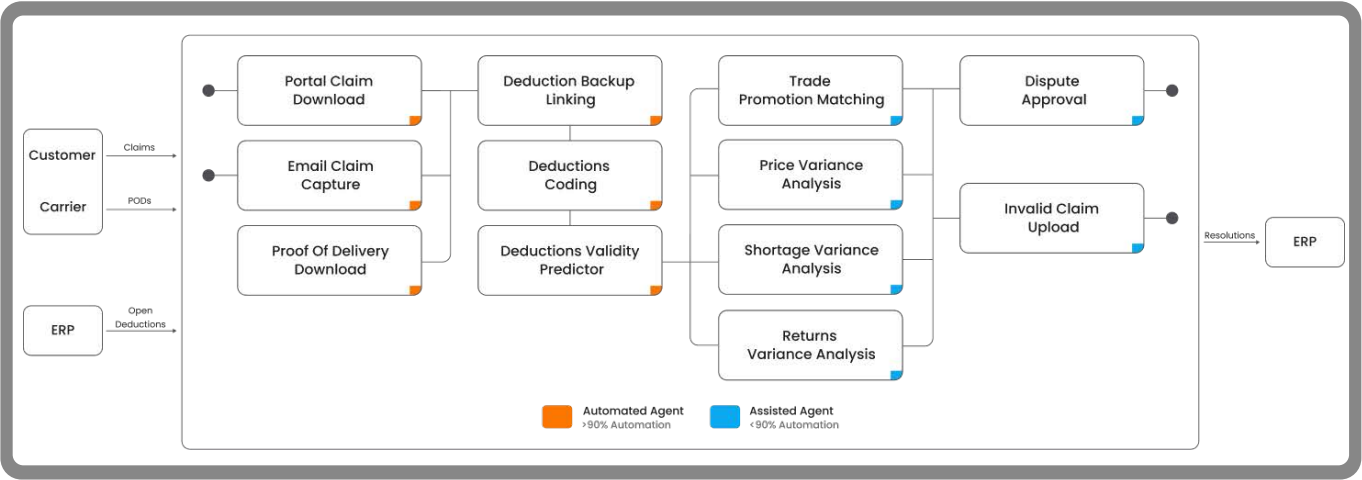

Automated Deduction Validation

AI agents auto-match deductions with pricing contracts, trade promotion data, and delivery proofs—removing manual lookups and reducing validation time.

Automated Workflows & Approvals

AI agents auto-assign deduction owners, manage cross-team collaboration, and trigger multi-level approvals—reducing delays and manual coordination.

Deductions Agentic AI Orchestration

Value Creation at 1100+ Enterprises

YASKAWA   L'ORÉAL   DXP   BLUELINX   CALIBER.

Plug-and-Play Integrations with ERPs & Other Financial Systems

ERP & TPM Systems Integration

Out-of-the-Box Integration with all Major ERPs & TPM systems: Supports all major ERPs such as SAP, Oracle NetSuite, Microsoft Dynamics, Sage Intacct, and others.

Posting Logs - - Non-Trade Resolution Posting: Extracts the statuses related to postings of non-trade resolutions from ERP to HRC SFTP through client-owned middleware.
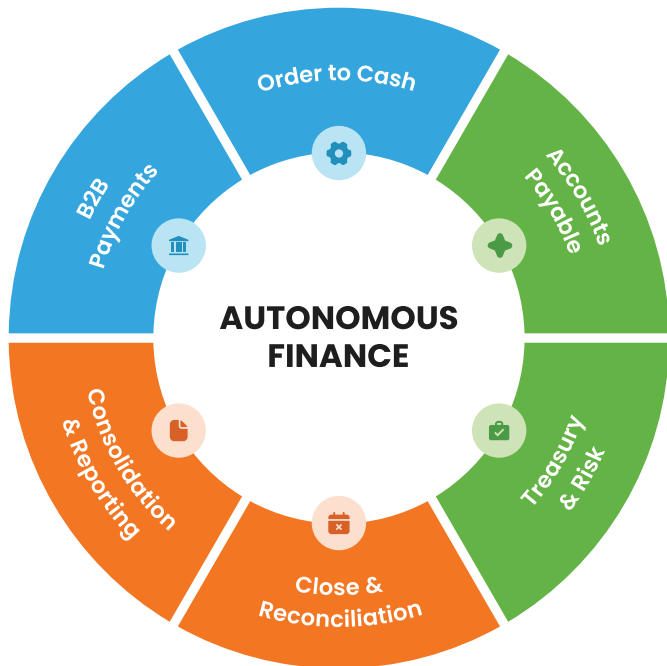

Keep Your Data Confidential and Safe

HighRadius' Deductions Software has all the necessary compliances and accreditations required to keep your data confidential and safe.

- Compliance with industry standards and regulations, including GDPR, HIPAA, SOC 1 Type 2, SOC 2 Type 2, and PCI DSS

- Comprehensive InfoSec reviews from multiple banks and over 500+ corporate customers

- Encryption of data at rest and in transit, ensuring data privacy and security

- Role-based access controls to ensure authorized access to data

Increase Net Recovery Rate by 30%

Don't settle for the ordinary. Discover the extraordinary with HighRadius.
