

Achieve **100% Automated Invoice Delivery** with HighRadius E-Invoicing Software

HighRadius Electronic Invoicing Software empowers businesses to evolve with the changing invoicing needs of the buyers. It drives significant cost savings by automating the delivery of invoices to buyer AP portals. It also enables merchants to keep up with the statutory regulations in EMEA and APAC for B2B invoicing by delivering invoices to the government portals through the PEPPOL network etc. The software's intuitive Customer portal not only streamlines payment acceptance but also fosters ACH adoption, enhancing customer satisfaction and loyalty. It enables teams to focus on high-impact initiatives that drive growth and innovation, thus unlocking new levels of efficiency and accelerating cash flow in today's digital-first economy.

100%

Automated Invoice Delivery

30%

Increase in Electronic Payments Adoption

40%

Increase in Analyst Productivity

\$5+

Savings on Every Payment Received

Automating the invoice delivery process across all channels and streamlining the payment acceptance process helps reduce the time spent on manual and repetitive tasks, thus helping increase billing analyst productivity.

Encouraging customers to adopt ACH payments by providing an intuitive Customer portal reduces the overall cost of accepting payments. Campaign Management and low-touch registration process increase buyer adoption of the portal and eventually increase the number of electronic payments.

The Challenge

Manual Invoice Delivery Processes

Tedious and time-consuming manual processes for invoice delivery and management.

Low Adoption of Electronic Payments

Reluctance among customers, especially small businesses, to adopt electronic payment methods.

Complex Billing Administration

Time-consuming and error-prone management of buyer preferences, payment methods, and disputes.

The Solution

Automated Invoice Delivery

HighRadius Electronic Invoicing uses out-of-the-box integrations with AP portals to automate invoice delivery via integrated RPA agents or APIs, eliminating manual effort and ensuring timely delivery to customers' portals or email inboxes.

Encouraging Electronic Payment Adoption

Through targeted e-adoption campaigns and a user-friendly self-serve portal, e-adoption campaign management promotes electronic payment methods, reducing processing costs and increasing efficiency.

Simplified Billing Administration

With the Merchant Administration Portal, billing teams can efficiently manage buyer preferences, payment methods, and disputes, reducing administrative burden and ensuring accuracy.

Changing Global E-Invoicing Regulations

Maintaining compliance with ever-evolving rules and regulations is a tedious task and also has an associated risk of rejection and discrepancies if they are not compliant.

Inefficient Buyer-Supplier Collaboration

Lack of effective channels for communication and document exchange between buyers and suppliers.

Auto-Post invoices to Government Portals

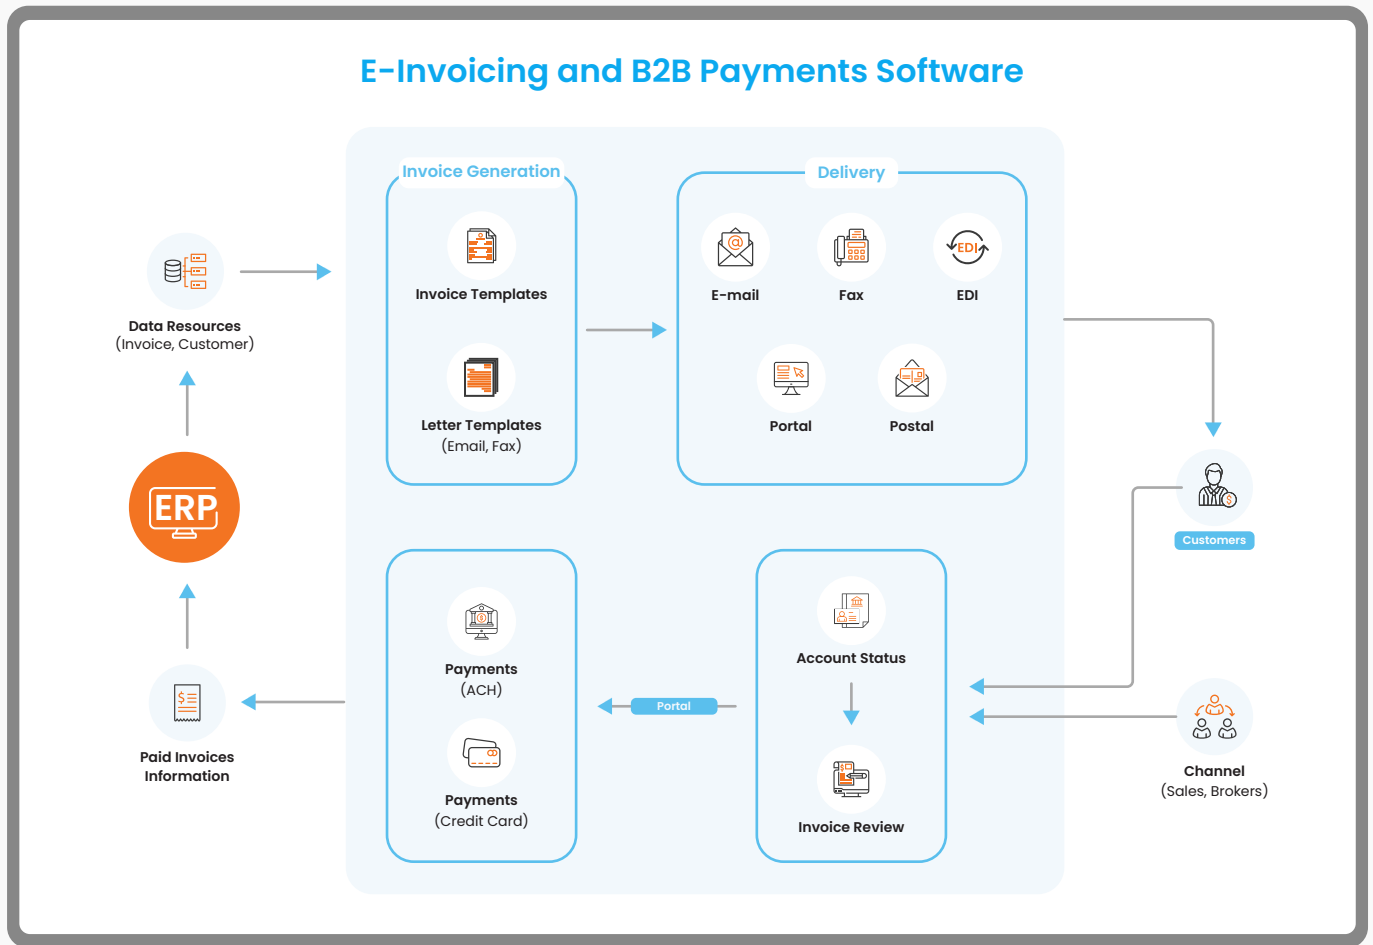

Electronic Invoicing will get the raw invoice data, automatically identify the geography the invoice has to be delivered to, and will upload the relevant data to the corresponding government portal in compliance with local requirements.

Streamlined Collaboration

The platform facilitates seamless communication and electronic remittance creation via self-serve portal, enhances collaboration and efficiency.

Seamless Connectivity with ERPs & Payment Processors

ERP & TPM Systems Integration

Out-of-the-Box Payment Service Provider Integration: Seamlessly integrates with over 100 payment processors, like Chase, First Data, CyberSource, Worldpay, and more. This extensive choice of payment processors allows users to choose the solution that best fits their B2B payment needs while maintaining existing bank relationships.

Get pre-built integration with **major ERPs including SAP, Oracle, Sage Intacct, Microsoft Dynamics, and more.**

Get **out-of-the-box API** for integrating with global processors such as **Chase, FirstData, Elavon, and more.**

HighRadius connects with a large number of tools in the OTC technology landscape to provide **~80% automation** potential

The Dynamic Duo of Data Security and Compliance

HighRadius' E-Invoicing and Payment Software has all the necessary assessments, compliances, and accreditations to keep your data confidential and safe.

- Supports assessments and global compliances, including ISO 27001:2013, HIPAA, SOC 2 Type 2, PCI DSS, and more.
- Provides industry-based security frameworks and practices

About HighRadius

HighRadius offers cloud-based **Autonomous Software** for the Office of the CFO. More than 850 of the world's leading companies have transformed their order to cash, treasury and record to report processes with HighRadius. Our customers include 3M, Unilever, Anheuser-Busch InBev, Sanofi, Kellogg Company, Danone, Hershey's and many more.

Autonomous software is data-driven software that continuously morphs its behavior to the ever-changing underlying domain transactional data. It brings modern digital transformation capabilities like artificial intelligence, robotic process automation, natural language processing, and connected workspaces as out-of-the-box features for the finance & accounting domain.

Before the availability of autonomous software, finance stakeholders had to pick between a digital replacement of a paper-based solution or build & maintain custom RPA/AI-based tools in-house. In contrast, HighRadius' Autonomous platform combines the best of both worlds to deliver measurable business outcomes such as DSO reduction, working capital optimization, bad-debt reduction, reduced month-end close timelines, and improved productivity in under six months.
